Current Email: **engr.abmanan212@hotmail.com**

Driving License: UAE (614628)

UAE Experience 6+ years

PROFILE SUMMARY

I am seeking job an engineering / Senior Software Engineer position in the field of software development. I have overall 10 years of working experience as a Software Engineer. Technical and communication skills have helped me to become a good team player during my professional career. Results-driven IT personnel with skills in the team managing and problem-solving with an established reputation for easily working and being adaptable to changing environments. I have an excellent ability to align teams and drive collaboration and cohesion to complete projects quickly and cost-effectively.

Having experience in SQL Server, Business Intelligence tools Power BI, Power map and MS Excel. I have skills to analyze larger data sets using MS Excel, SharePoint, and Power BI. Supported and helped modify existing Desktop application, Web applications, Power BI, Crystal Reports, SQL, MYSQL and MS Access databases.

KEY TECHNICAL SKILLS

DEVELOPING & PROGRAMMING TOOLS	HTML5, JavaScript, React JS, jQuery, CSS3, Bootstrap, REST APIs, WEB API, Entity Framework, MySQL, and PHP (LAMP), OOP, MVC, CRM, Adobe Photoshop CS6, Adobe Dreamweaver, Linux, Apache, E Commerce Websites, Microsoft Power BI.
SOFTWARE TOOLS	Visual Studio, 3D Printing, Quality Assurance Testing, Agile, Integration Testing, Redmine, MS Office, Windows Service, SDLC.
DATABASES	SQL Database, Oracle Database, MySQL, Microsoft Access.

KEY SPECIALTIES:

- Full-stack development with OOP concepts, Data Structures, and Algorithms.
- Skilled at reading and writing code using viable inputs and outputs after an accurate assessment of pre-and post-conditions.
- Experienced at designing unit tests to measure the effectiveness of software programs, backend services, and user interfaces.
- Experienced in Application development and SaaS implementation.
- Experience in Install and launch Power BI Desktop and Published, Managed and Embed online report.
- Designing, developing, and maintaining business intelligence dashboards.
- Designed multiple dashboards and reports by importing data from Excel, CSV, SQL Server, MySQL, and Oracle using Microsoft Power BI.
- Getting data with Power BI service and export a report from Power BI service to Desktop.
- PHP Development experience within HTML, CSS, AJAX, CMS, JavaScript, WordPress, Custom MVC.
- Strategic Expert Web-Based Applications using PHP technologies and Linux development environments over Apache LAMP.
- Enforcement Systems Installation, Web-based Development, Testing, and Troubleshooting for Sharjah, Ajman, Khorfakkan, and Kalba Radar Traffic Departments.
- Managed Police Control Center for all kinds of support Like (Radar Applications, Hardware, Cameras, Lenses, Flash, and Networking).
- Maintain documents of work performed during the day.
- Provide first- and second- hardware/software/network troubleshooting via remote support.

EDUCATION & CERTIFICATION

Master of Science, Computer Engineering

NUML | PAKISTAN, ISLAMABAD

Bachelor of Science, Computer Engineering

IUB | PAKISTAN, BAHAWALPUR

SDP, Computation, and Problem-Solving.

SDP, Performance, Data Structures, and Algorithms Solving.

Learning Microsoft Dynamics for Customer Service by LinkedIn Learning registered with (NASBA)

Power BI Essential Training by LinkedIn Learning registered with (NASBA)

EXPERIENCE & NOTABLE CONTRIBUTIONS

SOFTWARE ENGINEER

Freelance • 2021 - Present

I started data analysis (power bi and front-end development) as a freelance. In UAE I got multiple projects like a One-page Chat BOT Web base application with SMS integration.

My Role

- As a Software Engineer, my role was discussing project like (flow chats, flow of application and front-end and back-end) with clients.
- Proven ability to integrate out-of-the-box thinking and problem-solving analysis to improve processes, systems, and methodologies.
- I have ability to design logos, Banners, website slider, Website Design slicing, quality of pictures for web portal.
- I was creating storeroom form and **ReactJS dashboard** as a CMS in react-native typescript application with Firebase.
- Integrated React Application in an existing WordPress website, to implement the new **client-side feature**.
- Installed **NodeJS** on (Cloud Hosting Service) to fetch data from MySQL database.
- Integrated *Chat Bot* web application with help of their support, to an existing website.
- Created email templates using HTML and CSS.

COMPUTER ENGINEER

Ramex Gulf General Trading LLC • UAE • 2015 - 2021

Planning and controlling the IT department. Defining policies and procedures to run smooth operations of the department. Hiring new and innovative talent for the department. Ensure technology is accessible and equipped with current hardware and software.

My Role

- As a Computer Engineer, my role was arranging meetings to discuss projects/assignments, plan strategies, and suggest improvements.
- Make decisions regarding real-time incident resolution activities.
- Embedded web services, Dedicated devices, Laser, Speed, and Red-light radar applications with cameras.
- Researched coding and database concerns to resolve non-functional applications issues.
- Monitor and Maintain technology to ensure maximum access.
- To make peripherals configuration assisted the networking team to build the network's infrastructure, servers, routers, access points, cabling" network administrating.
- Supplied troubleshooting, analysis, and solutions for clients' database and application issues.
- Provide first- and second- hardware/software/network troubleshooting via remote support.

PROJECT MANAGER IT

Learning Dimensions Pvt Ltd • Pakistan • 2013 - 2015

Development of Software Engineering strategies that broadened our brand applications awareness and our company's web presence. Focused our department on environmentally friendly approaches.

My Role

- Managed all application functions with estimated budget, including project management, documentation, advertising, controlling quality, and events.
- Installation New Server and Server Configuration on Ubuntu.
- Designed and implemented Learning Management System (LMS) based on a Web multi-tiered application on PHP Remoting platform.
- Web Application (Design Database, Application Flow Chart, Frontend, Backend).
- Developed Learning Management System with Presentations, Business Logics, Voice Over, Video Rendering.

SOFTWARE DEVELOPER

Computer System Integration CSI • Pakistan • 2012 - 2013

I worked as Software Developer at Computer System Integration. During that year I acquired extensive knowledge of Web technologies (PHP, Web Development, etc.). As a developer expert in the design, development, and delivery of cost-effective, high-performance technology solutions. Extensive qualifications in all facets of project lifecycle development.

My Role

- Providing front-end and back-end support for the distributed applications and guiding new trainees.
- Created and implemented database architecture.
- I managed resources to deliver projects within a predetermined timeframe.
- Programmed several large Web sites from scratch and created several custom-made content management systems.
- Developed and implement technical aspects of organization, structure, and procedures for all departments.

SOFTWARE DEVELOPER

CIRCLE • Pakistan • 2010 - 2012

An exceptionally skilled and professional Software developer with years of experience and expertise in website design, systems analysis, and application integration. I have a special ability to maximize productivity, increase reliability, and introduce system efficiencies.

My Role

- Designed and maintained an Internet retail site.
- Developed several Web Portal from Start to end and created content management systems.
- Tasked with the management of daily site updates of store locations, sales promotions, and other Web content through customized back-end administrative applications.
- Created a reporting application for site statistics, store promotion activity, and email campaign tracking results.

- Worked closely with web designers/UI and team to produce the website.
- Constant communication with other colleagues in the business to developed and deployed their content.
- Maintaining and expanding/enhancing the website.

PROJECTS

- System Irregularity Vehicles Fine ERP in .NET with Oracle Database Like (Radar, Red-light and Truck) implementation and documentation.
- Exported and imported data using export/ import utilities; performed Migration from ORACLE to SQL.
- Truck Permission ERP for permitting Trucks with Oracle Database in SRTA.
- Installations, Calibrations, activation, and handover Radars Application in Sharjah Police.
- Enforcement Radar (Speed, Red-Light and Mobile Radar) Application with smart microsensor and IBO sensor. FTP Transfer Images and Videos via 3G Router (D-Link and Teltonika) in Traffic Department Sharjah and Ajman.
- Jointech Intelligent Electronic Locks ERP handle frontend via web base and Server base and support for Sharjah Traffic Department.
- Call Center Application (VoIP) Inbound and outbound with DGM hardware devices.
- Call Center Reporting Module like Agent, Inbound, outbound, daily monthly, and yearly reports.
- Storeroom, Warehouses, and Accounts ERP's handle frontend and backend.
- School Content Management System (CMS) Developed by ninthd Project in Custom PHP.
- Prepaid Billing System electrical meter reading Developed in Custom PHP. We use this application with hardware like E-Meters with SIM card and calculate bill for customer.
- Rescue 1122 monitoring ERP with call center and Embed SMS API using ASTERISK Database.
- Developing and Managing CIRCLE Website for NGO.
- Library Application Developed in Core PHP and using MySQL Database.
- ID card reader Application using OCR and records store in SQL database.

ADDITIONAL

Developing Tools:

Vb.Net, Crystal Reports, Shell script, Microsoft Dynamic 365, Power App, Power BI, Bootstrap, Linux, Command base programming like (Script files .sh, .bat)

Designing Tools:

Microsoft SQL Server, Git, SVN, Email, Domain, Hosting Server configuration, Windows 10, Installation, Network security, Backup systems, Firewalls and VPNs, Routers, LAN/WAN connectivity, TCP/IP, Query Express for (SQL, Oracle 11g), Navicat for MySQL, Toad, Quality Assurance Testing, Agile, Visual Studio Code, Android Studio, DaVinci Resolve for Video Editing.

Business Knowledge:

Business Analysis, Problem Solving, Data Analysis, Digital Marketing, Quality Management, Google Analytics, Communications, Microsoft Office (Word, Excel, PowerPoint). Accounts Systems, Customer Relationship Management (CRM), Inventory Management, Database Management System (DBMS)
