| Objectives / Student Learning Outcomes:<br>Students will be able to learn                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                       |         | <ul style="list-style-type: none"> <li>Recognize that heat and light of sun helps to sustain life on earth</li> <li>Define habitat and describe the different kinds of habitats for living things</li> </ul> |                     |          |                               |             |     |
| <p><b>Introduction:</b> Start the lesson by asking few questions from the students, such as:</p> <ul style="list-style-type: none"> <li>➤ What is solar energy?</li> <li>➤ Why is the solar energy important for living things?</li> <li>➤ What is meant by habitat?</li> </ul> <p><b>Methodology: Discussion</b></p> <ul style="list-style-type: none"> <li>Explain the solar system to the students in detail.</li> <li>Discuss the importance of solar energy for the living things.</li> <li>Tell about the water cycle.</li> <li>Describe about habitat and its types.</li> </ul> <p><b>Written Activity:</b></p> <ul style="list-style-type: none"> <li>Students will do the worksheet.</li> </ul> <p><b>Wrap up:</b> To check that objective has been achieved or not, ask some questions from the students. Such as:</p> <ul style="list-style-type: none"> <li>➤ What do we get from the sun?</li> <li>➤ Define habitat.</li> <li>➤ Discuss the worksheet with the students.</li> </ul> <p><b>Note:</b> Teacher will use pictures, flash cards, and charts to make the students understand the concept more clearly.</p> |                                                       |         |                                                                                                                                                                                                              |                     |          |                               |             |     |

## General Knowledge Worksheet

**Chapter: The Earth as a living planet**

**Name:** \_\_\_\_\_

**Class: III**

**Date:** \_\_\_\_\_

❖ **Write the answers of following questions.**

**1. What do we get from the sun?**

---

---

---

**2. Define solar energy.**

---

---

---

**3. Why is solar energy important for human beings?**

---

---

---

**4. What is habitat?**

---

---

---

**5. How does solar energy provide us water?**

---

---

---
