

Lesson Code		2022-08-01	Level	Elementary	Total Time	40mins	Teaching Week	August(01-05)		
Subject		Computer Science		Books	Online with Computers 07 (Revised Edition)		Page No.	5-8	Class	VII
Day	Chapter Topic	Objectives: The students will be able to:	Teaching Resources:	Teaching Learning Strategies						
Day 1	Computer Software	learn about computer software	Textbook	Introduction - On the 1st day of the class, interact with the students in a friendly manner. - Introduce yourself and the subject. Methodology (Discussion & Questioning) - Recalling the prior knowledge, ask the students if they remember the definition of computer software. - Differentiate between system software and application software. - Discuss the functions of system software and its three types. - Discuss the answers of questions on textbook pages 10-12 related to page 5. - Write down the answers in notebook. - This concept can very well be understood with the help of this video link. https://youtu.be/XyTATNKjHHU Wrap up Recap of the lesson by asking questions; - What is software? - For what purpose software is used? Home Work						
Day 2	Computer Software	infer about transfer of operating system	Textbook	Introduction To check the prior knowledge of students, following question will be asked: 1. Define system software Methodology Discussion Method - Explain that an operating system is a software that controls the overall activity of a computer system. - Explain that how operating system provides an interface between the user and the computer hardware. - Explain the task performed by operating system by writing on the board, so the students can understand easily. - Discuss the types of operating system in detail. - Ask them to read, discuss and understand the tasks, types and functions of operating system. - Discuss the answers of questions on textbook pages 10-12 related to page 5-6. - This concept can very well be understood with the help of this video link. https://youtu.be/XyTATNKjHHU Wrap up - Differentiate between single user and multiuser operating system. Home Work: Write down the names and functions of types of operating system.						
Day 3	Computer Software	deduce about utility program interpret about programming language	Textbook	Introduction To recall the prior knowledge, call out any two students and ask them to write the answers of following questions on the board. - What is Multitasking operating system? - What are the tasks performed by operating system? (any two) Methodology Explanation Method						

				• Write the definition of utility program on the board. • Describe the function of utility program. • Explain the difference between utility program and operating system. • Explain the functions of different utilities. • Explain the two types of programming languages by writing on the board, so the students can understand easily. • Define the Low level language and describe that how low level languages are understood by the computer. • Discuss the advantages of high level languages. • Discuss the answers of questions on textbook pages 10-12 related to page 6-7. • This concept can very well be understood with the help of this video link. https://youtu.be/XyTATNKjHHU • https://youtu.be/FdZK60PGx5E Wrap up • Discuss the different utilities. • Ask randomly any student to recall all the function of utility program. Home Work: Solve the worksheet.

Worksheet for day3

Worksheet

Name: _____

Date: _____

Q1. Enlist the tasks performed by operating system.

1. _____

2. _____

3. _____

4. _____

Q2. Define of the following languages:

a) Programming language:

b) Machine language:

c) Assembly language:
