

Lesson Code		2022-08-02	Level	Elementary	Total Time	40mins	Teaching Week	August(08-12)		
Subject		Computer Science		Books	Online with Computers 07 (Revised Edition)		Page No.	8-12	Class	VII
Day	Chapter Topic	Objectives: The students will be able to:	Teaching Resources:	Teaching Learning Strategies						
Day 1	Computer Software	- Understand the advantages of high level languages - be familiar with the uses of Language Processors	Textbook	Introduction To check the prior knowledge of students, following question will be asked: 1. Explain the difference between C and C++ language. Methodology (Discussion & Questioning) - Explain the advantages of High Level Languages in details. - Discuss the uses of Language Processors. - Explain the following three types of language translators: 1.Assembler 2.Interpreter 3.Compiler - Explain the differences between above mentioned language translators in detail. Must know: Lot of languages cannot easily be categorized as high level or low level languages. Like C, is compared to assembly language, but there is enough scope for high level abstraction in C. This concept can very well be understood with the help of this video link. https://youtu.be/EHDXig7M-d4 Wrap up To check that objective has been achieved or not, ask some questions from the students. Such as: 1. Define language processors. 2. Describe the advantages of high level languages. 3. Differentiate between assembler and compiler. Home Work						
Day 2	Computer Software	describe application software	Textbook	Introduction To check the prior knowledge of students, following question will be asked: 1. Describe the advantages of high level languages. Methodology Discussion Method - Discuss the uses of application software. - Explain the following two types of application software: - Packages - Customized Software This concept can very well be understood with the help of this video link. https://youtu.be/EHDXig7M-d4 Wrap up To check that objective has been achieved or not, ask some questions from the students. Such as: 1. Define Application software.						

				2. Briefly explain the uses of following software: - Word processing software - Electronic spreadsheets - Presentation graphic software - Database management system (DBMS) 3. Differentiate between packages and customized software. Home Work: solve part A
Day 3	Computer Software	learn the key terms solve the exercise given at the end of lesson	Textbook	Introduction To check the prior knowledge of students, following question will be asked: - Differentiate between input and output. Methodology Explanation Method - Learn the key terms given on page 10 - This is an important chapter. The language processors, including compilers, interpreters and assemblers etc. should be well explained. - Emphasis should be given on the importance of operating system or utility software to a computer. This concept can very well be understood with the help of this video link. https://youtu.be/8HvqEQYp3Vk Wrap up Students will write about any two things they have learned in the lesson. Home Work Solve the given worksheet.
Day 4	Computer Software	solve the exercise related to the topic	Textbook	Introduction - To recall the prior knowledge, following question will be asked from students: - Differentiate between multiuser and multitasking. Methodology (Explanation & Discussion) - The students will be asked to solve part D answer the following question on their notebook. - This concept can very well be understood with the help of this video link. https://youtu.be/8HvqEQYp3Vk Wrap up Solved exercise will be discussed. Home Work: solve part B and C.

Worksheet for day 3

Worksheet

Name: _____

Class: 7th

Answer the following questions:

1. What do you mean by DBMS?

2. Define the function of mnemonic.

3. What do you mean by data compression?
