

Lesson Code		2022-08-01	Level	Elementary	Total Time	40mins	Teaching Week	August (01-05)		
Subject		Computer Science		Books	Online with Computers 08 (Revised Edition)		Page No.	5-8	Class	VIII
Day	Chapter Topic	Objectives: The students will be able to:	Teaching Resources:	Teaching Learning Strategies						
Day 1	Computer System and Devices	comprehend how computer takes inputs	Textbook	Introduction - On the 1st day of the class, interact with the students in a friendly manner. - Introduce yourself and the subject. Methodology (Discussion & Questioning) - Recalling the prior knowledge, ask the students about input - Differentiate between input and output. - Write down the definition on device driver on board. - Explain device driver and discuss that device driver embeds the capability to interact with that particular device in the operating system. - Discuss the functions of device driver. - Discuss the answers of questions on textbook pages 11-12 related to page 5. - Write down the answers in notebook. - This concept can very well be understood with the help of this video link. https://youtu.be/j24ZsDFIGa4 Wrap up Recap of the lesson by asking questions; - What is input? - What is device driver? Home Work						
Day 2	Computer System and Devices	infer about input devices	Textbook	Introduction To check the prior knowledge of students, following question will be asked: 1. For what purpose device driver is used? Methodology Discussion Method - Explain that the devices used to enter data are called input devices and discuss that keyboard is an input device and when we press a key on the keyboard, the key pressed is stored in a buffer. - Define that buffer known as keyboard buffer. - Explain that how graphics tablet enables a user to create drawings on the computer by hand. - Explain about stylus. - Discuss the functions of Magnetic Ink Character Reader (MICR). - Discuss the uses of Magnetic Strip Reader. - Explain the differences between Magnetic Ink Character Reader and Magnetic Strip Reader. - Explain the functions of smart card reader, touch screen and microphone. - Discuss the answers of questions on textbook pages 11-12 related to pages 5-7. - This concept can very well be understood with the help of this video link. https://youtu.be/j24ZsDFIGa4 Wrap up - Differentiate between single user and multiuser operating system.						

				Home Work: Write the functions of keyboard. Graphic Tablet, Magnetic Ink Character Reader and Magnetic Strip Reader.
Day 3	Computer System and Devices	differentiate between the processing device and memory system	Textbook	Introduction To recall the prior knowledge, call out any two students and ask them to write the answers of following questions on the board. • Define graphic tablet. • What is a buffer? Methodology Explanation Method • Describe the function of processing device. • Define memory unit. • Explain the functions and differences between Memory Data Register (MDR) and Memory Address Register (MAR). • Explain that ROM is the kind of memory that is used to load the operating system of the computer. • Discuss the answers of questions on textbook pages 10-12 related to page 7-8. • Students will note down the answers in the notebooks. • This concept can very well be understood with the help of this video link. https://youtu.be/j24ZsDFIGa4 Wrap up • Briefly discuss the functions of different input devices. Home Work
Day 4	Study of Microsoft Windows (Practical #1)	Study how to properly shut down or restart windows 8 by using Ctrl+Alt+Del keyboard combination and using the window 8 charms bar	Textbook	Introduction To check the prior knowledge of students, following question will be asked: 1. Define keyboard and its keys. Methodology (Pair and share work) • Explain different types of windows. • Discuss that the Windows 8 charm bar is the (central) toolbar in Windows 8, which can be accessed from the desktop view of Windows 8 or the Windows 8 start screen, • Take students to Computer laboratory. • Divide students in groups of 6-7 students. • Ask students to read procedure of practical# 1(Method 1&2) page no. 2. • Guide the students while starting. Students will record details about the practical on page no.78-80 computer Science Practical Notebook 8. Wrap up To consolidate the topic ask some questions to the students, such as: 1. What is the shortcut way to use the Ctrl+Alt+Del? 2. Define windows 8 charms bar. Home Work
