

Lesson Code		2022-08-01	Level	Primary	Total Time	40mins	Teaching Week	August(01-05)	
Subject		Computer Science	Books	Online with Computers 03 (Revised Edition)		Page No.	5-6	Class	III
Day	Chapter Topic	Objectives: The students will be able to:	Teaching Resources:	Teaching Learning Strategies					
Day 1	Computer Fundamentals Devices	get introduction about computer science	Textbook	Introduction - On the 1st day of the class, interact with the students in a friendly manner. - Introduce yourself and about the subject. - Ask the names of the students. Methodology - Ask the students if they remember the definition of computer science. - Listen to their answers and write them on the board. - Write the correct definition of computer science on the board. - Explain the different parts of computer. - Make groups of 4 or 5. Ask the students to discuss amongst themselves what are the uses of computer and its parts. Always keeping the social distance and following the SOPs. Discussion Method - Ask the students if they remember the definition of computer science. - Listen to their answers and write them on the board. - Write the correct definition of computer science on the board. - Explain the different parts of computer. - Make groups of 4 or 5. Ask the students to discuss amongst themselves what are the uses of computer and its parts. Always keeping the social distance and following the SOPs. Wrap up - To wrap up the lesson, summarize the questions discussed in the class. Home Work					
Day 2	Computer Fundamentals Devices	explain what CPU stands for and what are its components explain the uses of the ALU, CYU and the Memory	Textbook	Introduction To recall the prior knowledge, following question will be asked from students: 1) Define computer. Methodology - Write CPU on the board. - Make a concept map with CPU at center with three lines, coming out labeled Control Unit (CU), Arithmetic Logic Unit (ALU) and the Memory Unit (MU). Involve the class by getting their input on what each of the three parts does. - Guide the class till you arrive at the actual function of each part. Explanation Method - Write CPU on the board. - Make a concept map with CPU at center with three lines, coming out labeled Control Unit (CU), Arithmetic Logic Unit (ALU) and the Memory Unit (MU). Involve the class by getting their input on what each of the three parts does. - Guide the class till you arrive at the actual function of each part. Wrap up To check that objective has been achieved or not, ask some questions from the students. Such as: 1. Describe the function of ALU. 2. Recall the names of various parts of a computer. 3. Define Memory Unit. Home Work: Learn the definitions of the parts of a CPU.					
Day 3	Computer Fundamentals Devices LAB	Learn the working on WordPad	Textbook	Introduction - To check the prior knowledge of students, following question will be asked: 1- What does CPU and VDU stands for? Methodology Switch on your Computer system and do the following tasks: - Open the WordPad by clicking the Start → All Programs → Accessories → WordPad. - Write about the main parts of a Computer.					

				• Write about primary memory and secondary memory. Wrap up • Solved lab work will be discussed. Home Work:

Lesson Code		2022-08-02	Level	Primary	Total Time	40mins	Teaching Week	August(08-12)	
Subject		Computer Science	Books	Online with Computers 03 (Revised Edition)		Page No.	7-10	Class	III
Day	Chapter Topic	Objectives: The students will be able to:	Teaching Resources:	Teaching Learning Strategies					
Day 1	Computer Fundamentals Devices	highlight the differences between the types of keyboard keys	Textbook	Introduction Recap the different parts of a computer. Students should name the parts as you write them on the board. Methodology Discussion Method - Students will read page7&8 of the textbook in pairs. Material required: a large poster of a keyboard or draw a large keyboard on the board with all keys clearly labeled. - Ask your students to look at the drawing of the keyboard at the front of the class. Does anyone know why the keyboard is known as the QWERTY keyboard? - Tell them to look carefully at the drawing. It is because of how the letters are arranged on the keyboard and more specifically on the first row, which has these letters clearly mentioned. Point to each of the keys as you make your explanation. - Identify keys other than the alphabet ones on the keyboard. You should get responses such as arrow keys, number keys; caps lock key, shift keys. - Explain the students that each of these keys has a specific function. Wrap up To check that objective has been achieved or not, ask some questions from the students. Such as: - What is input device? - Define keyboard and its different types of keys. - Differentiate between Caps Lock Key and Shift Key. Home Work solve the worksheet related to the topic.					
Day 2	Computer Fundamentals Devices	identify the keys on keyboard(cont.) understand the functions of Mouse	Textbook	Introduction To check the prior knowledge of students, following question will be asked: - Differentiate between Caps Lock Key and Shift Key. Methodology Explanation Method - Discuss the functions of the different keys of keyboard. - Students will come in pairs to explain what they have understood by reading the textbook. - Students will read page9 of the textbook in pairs. - Demonstrate the functions of mouse in detail. Wrap up To check that objective has been achieved or not, ask some questions from the students. Such as: - Define spacebar and cursor control keys.					

				2. Differentiate between delete key and backspace key. 3. Differentiate between right click and left click. 4. Define dragging and dropping. Home Work

Worksheet for day 1

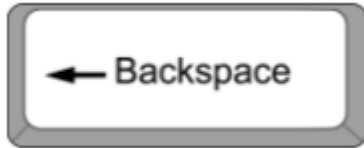

Worksheet 'Computer Fundamentals and Devices' Class: III

Chapter: 1

Name: _____

Date: _____

Q1: If you have typed a wrong letter or left a letter, then which of these keys helps you?

Q2: Write the missing letter in the space provided.

a) SP__C__B__R

b) E__T__R K__Y

c) S__IF__K__Y

d) DE__ET__K__Y
