

Lesson Code		2022-08-02		Level		Primary		Total Time		40mins		Teaching Week		August(08-12)	
Subject		Computer Science		Books		Online with Computers 05 (Revised Edition)				Page No.		9-13		Class V	
Day	Chapter Topic	Objectives: The students will be able to:	Teaching Resources:	Teaching Learning Strategies											
Day 1	Evolution of Computers	understand the computers of fifth generation	Textbook	Introduction To check the prior knowledge of students, following question will be asked: 1. Which was the generation of computers used in the late 1950s and 1960s? Methodology Discussion Method • Explain that in fourth generation of computer used LSI (Large Scale Integration) and microprocessors. • Discuss the function of Large-scale integration (LSI). • The various electronic computer generations will be discussed with the students. • The technique used in fifth generations will be explained to the students along with their advantages and disadvantages. • Discuss that an audio feature that fifth-generation computers will have is voice recognition. Wrap up To check that objective has been achieved or not, ask some questions from the students. Such as: 1. Define fifth generation of computer, 2. Differentiate between fourth and fifth generations of computer. Home Work Solve part E, F and G.											
Day 2	Evolution of Computers	identify and list the types of computers solve the exercise given at the end of lesson	Textbook	Introduction To check the prior knowledge of students, following question will be asked: 1. What does IC stand for? Methodology (Explanation Method) • Explain the four different types of computers. • Discuss the features of Laptop/Notebooks and handheld/pocket PC. • The students will be asked to solve part D (Answer the following question) and in their notebook. Wrap up To check that objective has been achieved or not, ask some questions from the students. Such as: 1. What is main frame computer?? 2. Define circuit board. Home Work solve part A, B and C observes and identify the correct answers.
