

Lesson code		2022-08-01	Level	Primary	Total Time	40mins	Teaching Week	August (01-05)
Subject		Science	Books	The Science Factor 4			Pg. 4-7	Class: IV
Day Time	Chapter Topic	Objectives: The students will be able to:	Teaching Resources:	Teaching Learning Strategies				
Day 1 40 min	Ch. 1 Characteristics and Life Process of Organisms Living things	Describe characteristics of living things Make a list of living and non-living things	Textbook, worksheet	Introduction Recap of prior knowledge by asking questions; - Ask students to give examples of living and non-living things. Methodology (Brainstorming and discussion) - Teacher will discuss how living things are different from living things by giving examples. - Teacher will explain characteristics of living things with the students. - Students will read and make a list of 5 living and non-living things in their notebooks. Wrap up Recap of the lesson by asking questions; - Write any two characteristics of living things. Homework Students will solve the worksheet.				
Day 2 40 min	Ch. 1 Characteristics and Life Process of Organisms Classification	Compare and contrast characteristics that distinguish major groups of living things (plants and animals). Identify differences between animals and plants	Textbook, board	Introduction Recap of prior knowledge by asking questions. - Are both plants and animals living things? Methodology (Explanation through discussion) - Discuss similarities and differences between plants and animals by drawing Venn diagram on the board. - Explain the division of animals into major groups according to their physical features. - Divide the students into groups and ask them to distinguish between cat and rose flower. Wrap up Recap of the lesson by asking questions; - What are the similarities and differences between plants and animals? Homework Revise and learn class work.				
Day 3 40 min	Ch. 1 Characteristics and Life Process of Organisms The Animal Kingdom	Define vertebrates and invertebrates. Classify animals in terms of vertebrates and invertebrates	Textbook	Introduction - Recall the concept of skeleton and its importance to the students. Methodology (Explanation through brainstorming and discussion) - Explain the division of animals into major groups according to their physical features. - Discuss characteristics and differences between vertebrates and invertebrates with examples. - Students will read and discuss in the class. Wrap up Recap of the lesson by asking questions; - What are vertebrates and invertebrates Homework Students will revise and learn class work.				

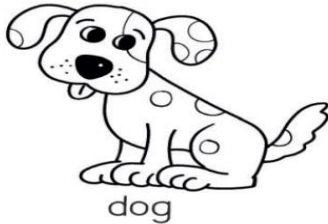

Day 4 40 min	Ch. 1 Characteristics and Life Process of Organisms The Animal Kingdom	Name vertebrates and invertebrates animals. Differentiate between vertebrates and invertebrates	Textbook, pictures/ flashcards	Introduction Demonstrate the location of the backbone by asking the students to touch the backbone of their friend and ask the following questions: • What do you think that what is the role of our backbone? • Do you know animals also have backbone? Methodology (Demonstration through activity based learning) • Show some pictures to the students like shown here to distinguish between vertebrates and invertebrates. • Ask the students to name the vertebrates and invertebrates they find in their school or house premises. • Draw this table on the board and ask the students to copy on their notebooks. Wrap up Ask the students that why snake and earthworm are placed in the different groups in spite of the fact that they have same body shapes. Homework Write the names of three vertebrates and invertebrates animals in your notebooks.
Day 5 40min	Ch. 1 Characteristics and Life Process of Organisms	Show their comprehension by solving questions	Textbook	Introduction • Review homework questions and recall prior learning. Methodology (Group based learning) • Divide the whole class in four groups. • Explain all the questions and ask them to discuss their answers among them. • Each group will share their respective answers with other groups. • Note down the answers on the textbook. Wrap up To check that objective has been achieved or not, teacher will ask some questions from the students. Such as: • Name tow warm blooded and cold blooded animals. Home Work Go through the written work, do the corrections and learn the answers done in class.

Subject: Science

Name: _____

Date: _____

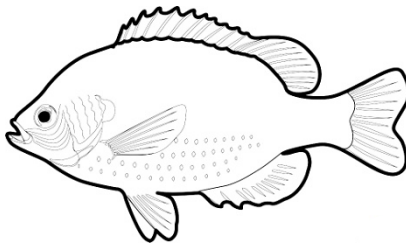

Q1. Here are different pictures of living things. Can you tell how each of them moves? Where do they live? Which type of food do they eat?

Move: _____

Live: _____

Food: _____

Move: _____

Live: _____

Food: _____

Move: _____

Live: _____

Food: _____

Move: _____

Live: _____

Food: _____

Q2. Mark a tick or cross in the relevant column and ask them to complete it at home.

No.	A.	Characteristics	Vertebrates	Invertebrates
1.		Presence of vertebral column		
2.		Small body size		
No.	B.	Example	Vertebrates	Invertebrates
1.		Fish		
2.		Lizard		
3.		Earthworm		
4.		Butterfly		
5.		Human being		
6.		Star fish		
7.		parrot		

Answer key

Students' answers may vary
