

Lesson code		2022-08-02	Level	Primary	Total Time	40mins	Teaching Week	August (08-12)		
Subject		Science	Books	The Science factor 5			Pg. No. 10-11		Class	V
Day Time	Chapter Topic	Objectives: The students will be able to:	Teaching Resources:	Teaching Learning Strategies						
Day 1 40 min	Unit 1 Classification of Living Things Animal cell	Name the parts of animal cells Describe functions of animal cell.	Textbook, board, marker	Introduction - Write the word “animal cell” on the board and encourage the students to participate in class discussion. Methodology (Discussion and demonstration) - Draw the diagram of an animal cell on board, mentioned on pg. no 10 on notebook and explain it. - Enlist the main parts of the cell and describe their functions. - Students will read and discuss in the class. Wrap up Recap of the lesson by asking questions such as: - Name the parts of an animal cell. - What is the function of nucleus? Home Work Revise and learn class work by using link below; https://youtu.be/EINiAfGxR2M						
Day 2 40 min	Unit 1 Classification of Living Things Animal cell	Define the parts of animal cell Make a model of animal cell	Textbook, board, marker	Introduction Recap of previous knowledge by asking brainstorming questions; - What are living things made up of? What are the major functions of cell? Methodology (Group activity) - Draw an animal cell on the board using the diagram from the textbook. Label the four key parts of the cell (nucleus, cytoplasm, cell membrane, and vacuole). - Arrange the students in groups and ask them to act out the materials for the activity. - Students will make a model of animal cell in groups. Wrap up - One presenter from each group will come and present their model. Home Work Revise and learn class work by using link; https://youtu.be/EINiAfGxR2M						
Day 3 40 min	Unit 1 Classification of Living Things Animal classification	Classify animals in vertebrates and invertebrates on the basis of their characteristics.	Textbook, board	Introduction (Warm Up Activity) - Show pictures of pigeon and butterfly. - Ask students to observe differences between them. - Discuss their observations in the class. Methodology (Discussion and Questioning) - Explain differences between vertebrates and invertebrates by giving examples. - Students will read and discuss in the class. - Students will make a table and note down differences in their notebooks. Wrap up Recap of the lesson by asking questions; - What are vertebrates and invertebrates? Homework						

				Students will revise and learn topic at home.
Day 4 40 min	Unit 1 Classification of Living Things Animal classification	Identify the animal kingdom Classify vertebrates and invertebrates	Textbook, board, flash cards	Introduction (Warm Up Activity) - Display pictures of different animals. Encourage the students to discuss among each other. Methodology (Discussion) - Ask the students to write a list of different animals. - Ask them to group the different animals based on any similarities that they may have, such as where they live, or whether they fly, swim, or walk on land. - Draw the animal kingdom as shown on page 11 and explain all physical features on which animals are divided. Wrap up To close the topic, discuss all the mentioned physical features of animals on the basis of which they are divided.
