

Lesson Code		2022-08-02	Level	Elementary	Total Time	40 min.	Teaching Week	August (08-12)	
Subject		Science	Books	Science Fact File 1 (2nd Edition)		Page No.	7-10	Class	VI
Day Time	Chapter Topic	Objectives: The students will be able to:	Teaching Resources:	Teaching Learning Strategies					
Day 1 40min	Unit 1 Science Skills Making difficult measurements	Infer about taking difficult measurements	Textbook, measuring cylinder, pendulum	Introduction In order to recall the prior knowledge ask the following questions from students: - Name three measuring instruments, also tell their uses. - What are the units of length and volume? Methodology (Discussion and Questioning) - Tell the students that it's pretty easy to measure with the right instruments. However, sometimes things can be a little more difficult to measure and need thinking about. - Explain problem 1 by using weight scale. - Teacher and students will discuss Q: 1 and then students will write answers in their notebooks independently. Wrap up - Discuss that right instruments make the measurements easy and recall the formulas applied in the problems. Home Work: Revise classwork					
Day 2 40min	Unit 1 Science Skills Making difficult measurements	Take measurements using measuring cylinder and pendulum	Textbook, measuring cylinder, pendulum	Introduction In order to check the prior knowledge ask the following questions from students: - How can we measure weight? - What are the units of mass and temperature? Have their responses and share your ideas with them as well. Methodology (Demonstration and Discussion method) - Explain problem 2 & 3 by using measuring cylinder and pendulum. - Divide the students into four groups and let them investigate problems 2 and 3 by using measuring cylinder and pendulum. - Teacher and students will discuss Q: 2-3 given on the textbook page. 8 - Go around the class to see if the students are doing the task correctly. Make corrections when and where required. Wrap up - Discuss that the right instruments make the measurements easy and recall the formulas applied in the problems. Homework: - Solve Q2-3-given on textbook Pg. 8.					

Day 3 40min	Unit 1 Science Skills Handling data	Infer about handling data	textbook, notebooks	Introduction In order to check the prior knowledge, ask any student from the class to come and define data. - Have their responses and share your ideas with them as well. Methodology (Discussion and Questioning method) - Explain the ways how it can be organized in different ways. - Explain that how to collect data in the forms of table and bar charts. - Discuss the questions (Q1-4) given on textbook page 9 and ask the students to write down the answers in their notebooks. - Go around the class to see if the students are doing the task correctly. Make corrections when and where required. Wrap up Recap of the lesson by asking questions: such as: - What is the difference between pie charts and bar charts? - Define line graphs. Homework - Revise the classwork.
Day 3 40min	Unit 1 Science Skills Handling data	Infer about line graph and pie chart	Textbook, notebooks	Introduction To recall the prior knowledge, following questions will be asked from students: - What is data? - What is a bar chart? Methodology (Discussion and Group Work) - Explain that how to collect data in the forms of line graphs and pie charts. - Divide the students into groups. - Students will draw line graphs and pie charts in groups. - Teacher and students will discuss the questions (Q 5&6) given on textbook page 10 and ask the students to write down the answers in their notebooks. - Discuss the worksheet and ask students to solve them in class. - Go around the class to see if the students are doing the task correctly. Make corrections when and where required. Wrap up Recap of the lesson by asking questions such as: - What is the difference between pie charts and bar charts? - Define line graphs. Homework - Revise the classwork and write down the answers of discussed questions in their notebooks.

Name: _____

Class: VI

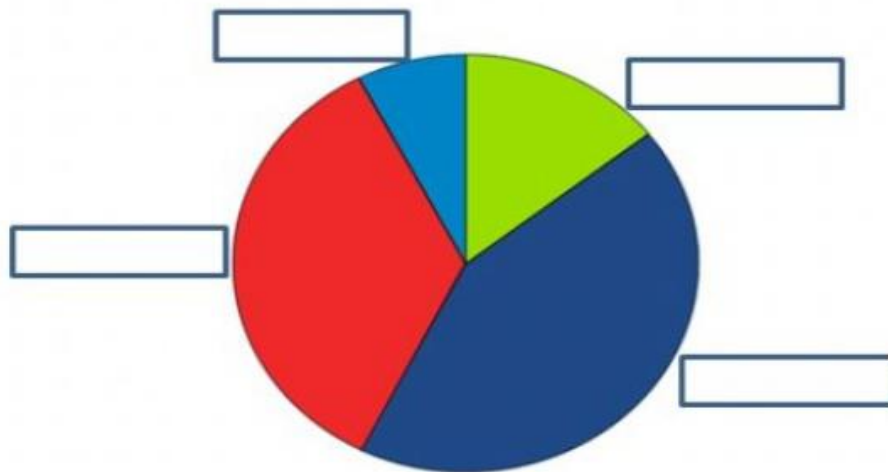

Date: _____

Ch 1: Science Skills

Q. Here is a table about pets that students have in one class. Label each sector of a pie chart.

Dog	Cat	Bird	Snake
6	5	2	1

And here is the pie chart:

Total pets =

% dogs =

% cats =

% birds =

% snakes =

Answer Key (Class VI-Science)

Q. Here is a table about pets that students have in one class. Label each sector of a pie chart.

- Refer to the textbook page. 10
