

Lesson Code		2022-08-01	Level	Elementary	Total Time	40mins	Teaching Week	Aug (01 – 05)	
Subject		Mathematics	Books	New countdown 6 2 nd Edition		Page No.	1 – 9	Class	6
Day	Chapter Topic	Objectives: The students will be able to:	Teaching Resources:	Teaching Learning Strategies					
Day 1	Unit 1: Introduction to sets	- be familiar with their classmates and teacher in a relaxed atmosphere - comprehend the basic concepts of sets - describe and illustrate well-defined and distinct sets	Textbook	- Teacher will introduce him/her self to the class. - Prior knowledge about sets will be discussed and new terms will be introduced Introduction; - This lesson is an introductory lesson to the topic of sets. The students will reinforce the ideas of sets, elements. - A set is a clearly defined collection of objects. - An element is the name given to an object within a set. Methodology: Students learn that a set is a collection of objects (elements) that have something in common. We define a set by listing or describing its elements. - Teacher will explain Q 1 given in Ex1a. - Students will solve the 1 in their notebooks. Wrap up: Summarize the lesson by highlighting the key points. i.e - Symbol used to belongs to is ____. _____ letter used to denote sets. _____ brackets used for sets.					
Day 2	Unit 1: Introduction to sets	Complete the ex1a.	Textbook	Introduction: - Teacher will revise the importance of sets and previous lesson. Methodology - Teacher will revise the concept of elements of sets. - Teacher will explain Q 2 to 4 given in exercise 1a. - Students will complete the question Q 2&3 in their notebooks. Homework: - Students will complete the question Q 4 in their notebooks.					

Day 3	Unit 1: Introduction to sets	- present the notation of sets - express sets in sentences, tabulation and notation form	Textbook	Introduction - Recall the previous lesson ask following questions from students: Teacher will write the sets as shown below and ask students what is wrong with this set $A = \{l, i, b, r, a, r, y\}$ - A capital letter is used to represent this set. - It uses curly braces. - It uses commas. - The objects in this set are not unique. Methodology Direct instructions: Explain that there are three ways to describe a set. i.e., Three ways to express sets are: - By expressing sets in words Example: $B = \{\text{prime numbers less than ten}\}$ - By roster way Example: $C = \{2, 3, 5, 7\}$ - By forming notation Example: $D = \{x/x < 10, x \in \text{prime}\}$ - Also explain the ways of describing sets with the help of different examples. - After this teacher will explain and solve Q1 to 3 of Exercise.1b - Students will solve Q1 & 2 of Exercise.1b in their notebooks. Homework: - Students will complete question 3 in their notebooks given on pg. 6 Exercise.1b.
Day 4	Unit 1: Introduction to sets	- define and explain a Venn diagram - explain components and purpose of a Venn diagram - correctly create a Venn diagram	Textbook	Introduction - To recapitulate the previous lesson, following questions may be asked. e.g. - What is a set and its elements? - How can we show the contrast of two ways of writing a set? Methodology Venn Diagram A diagram where sets are represented as simple geometric figures, with overlapping and similarity of sets represented by intersections and unions of the figures - Define the Venn diagram. - Teacher will highlight the important informative lines on the book page 6-7. - Explain the Q1, draw Venn diagram and explain the Q1 part I. - Students will solve Q1 given in ex 1c in their notebooks. Homework: Students will practice the ex 1c.
Day 5	Unit 1: Introduction to sets	Do the worksheet.	Textbook	Introduction: Revise the concept of Venn diagram Methodology - Explain given worksheet. - Students will solve the worksheet.

Name: _____

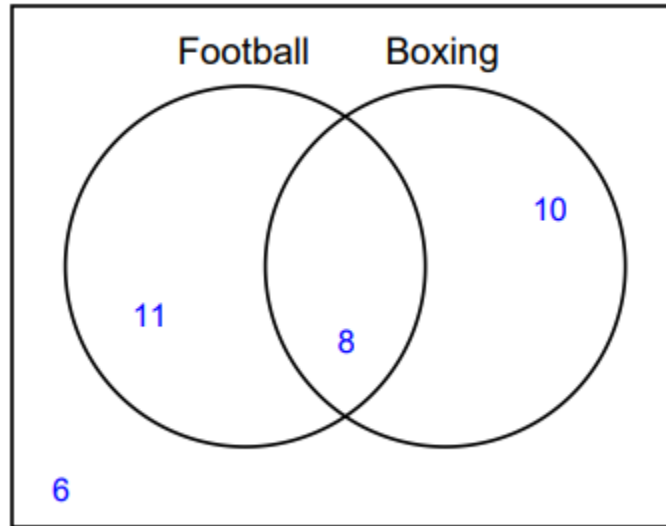

Class: VI

Date: _____

Topic:

Venn Diagram

Answer the Questions Based on the Venn diagram

- 1) How many students do not like Boxing? _____
- 2) How many students do not like both Football and Boxing? _____
- 3) How many students like both Football and Boxing? _____
- 4) How many students do not like either Football or Boxing? _____
- 5) How many students like Football? _____
- 6) How many students only like Football? _____
- 7) How many students like Boxing? _____
- 8) How many students do not like Football? _____
- 9) How many students like Football or Boxing? _____
- 10) How many students only like Boxing? _____

Answer key:

1) How many students do not like Boxing?	17
2) How many students do not like both Football and Boxing?	21
3) How many students like both Football and Boxing?	8
4) How many students do not like either Football or Boxing?	6
5) How many students like Football?	19
6) How many students only like Football?	11
7) How many students like Boxing?	18
8) How many students do not like Football?	16
9) How many students like Football or Boxing?	29
10) How many students only like Boxing?	10
