

Lesson code		2022-08-01	Level	Primary	Total Time	40mins	Teaching Week	August (01-05)	
Subject		Science	Books	The Science factor 5		Pg. No. 6-9		Class	V
Day Time	Chapter Topic	Objectives: The students will be able to:	Teaching Resources:	Teaching Learning Strategies					
Day 1 40 min	Unit 1 Classification of living things Five Kingdom System of Classification	Define classification and its importance Identify the five kingdom system of classification	Textbook, board, mark, pictures of different animals	Introduction Display pictures of different animals. Encourage the students to discuss among each other. Explain there is no right answer, the activity just gives them a chance to look carefully at different living organisms and think about the different ways that scientists have classified them. Methodology (Demonstration and discussion) - Define and explain the term ‘classification’. - Draw the five kingdoms system as shown on page 6 and explain it so the students can understand the division easily. - Explain all characteristic on which living organism are divided. Wrap up To close the topic, discuss all the mentioned physical features of organisms on the basis of which they are divided. Homework Solve the given worksheet attached.					
Day 2 40 min	Unit 1 Classification of living things Plant Cells	Name parts of plant cell Identify different parts of plant cell along their functions	Textbook, board, marker, plant and animal cell chart	Introduction - Display a chart of animal cell in the class. Ask questions to check their prior knowledge; - If you remember, name the parts of plant. cell Methodology (Discussion, questioning and demonstrating) - Draw the diagram of plant cell as shown on page 07 and also label it. - Explain each part with the help of diagram. - Ask the students if they have any questions, then discuss them. Activity Students will draw plant cell in their notebooks. Wrap up Recap of the lesson by asking questions such as: - What is the function of chloroplast in plant cells? Home Work Watch the following video lecture and revise class work. https://youtu.be/NmvXJHS302M					

Day 3 40 min	Unit 1 Classification of Living Things Plant cell	Define the parts of plant cell Make a model of plant cell	Textbook, board, marker	Introduction Recap of previous knowledge by asking brainstorming questions; - What is plant cell made up of ? - What are the major functions of plant cell? Methodology (Group activity) - Draw a plant cell on the board using the diagram from the textbook. Label the four key parts of the cell (nucleus, cytoplasm, cell membrane, and vacuole). - Arrange the students in groups and ask them to act out the materials for the activity. - Students will make a model of plant cell in groups. Wrap up - One presenter from each group will come and present their model. Home Work Revise and learn class work.
Day 4 40 min	Unit 1 Classification of living things Classification of plants	Define flowering plants Classify plants into two major groups (monocots and dicots) and give examples of each	Textbook ,flowers or pictures of monocot and dicot	Introduction - Ask the students what the terms “mono” and “di” mean. - Show pictures of monocots and dicots plants and ask students to name them. Methodology (Activity based learning) - Explain flowering plants by giving examples. - Explain monocotyledons and cotyledons by giving examples from daily life. - Divide the students into four groups and distribute pictures of monocots and dicots - Students will identify monocots and dicots and write their names in their notebooks. Wrap up Recap of the lesson by asking questions such as: - Give two examples of monocotyledons and cotyledons. Home Work Revise classwork.
Day 5 40 min	Unit 1 Classification of living things	Solve worksheet by revising taught concepts	board, marker, worksheet	Introduction - Give the students time to revise the topic. - Prepare the class to solve worksheets. Methodology (Pair Share Work) - Explain all the questions. - Students will discuss and solve worksheet in pairs. - Encourage the students for their efforts and discuss answers. Wrap up - Discuss answers with the students. Home Work Revise and learn worksheet.

Allied worksheet

Subject: Science

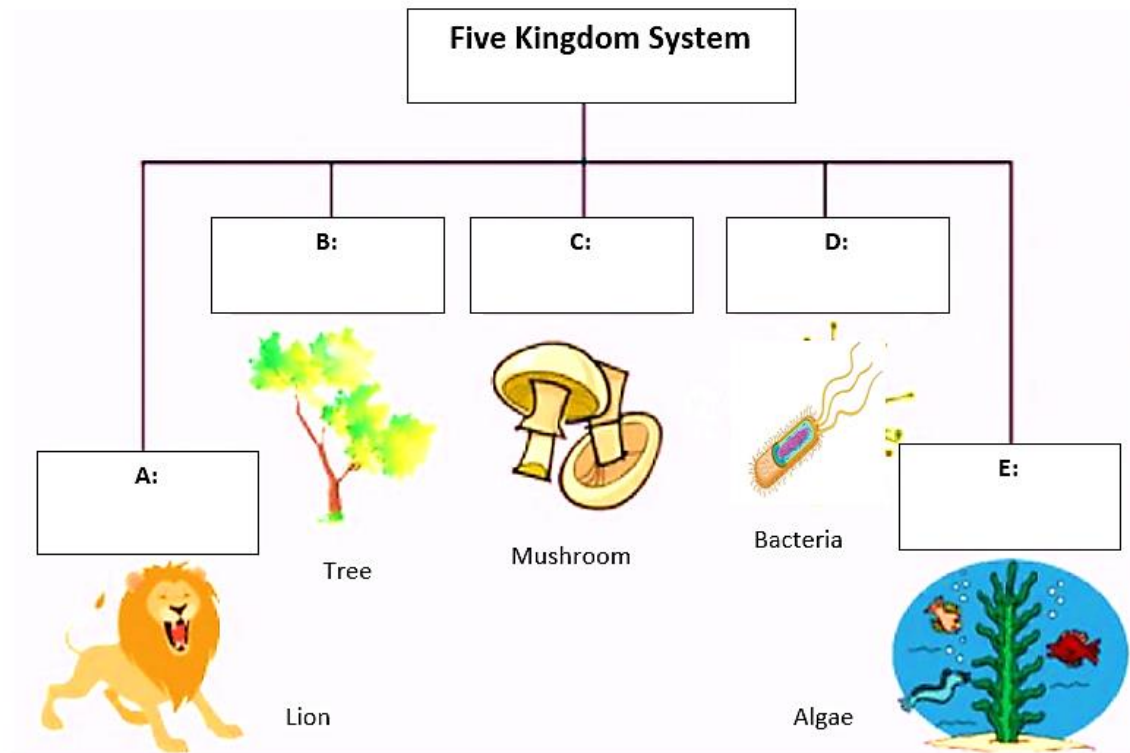

Name: _____

Class: V

Date: _____

Topic: Five Kingdom classifications

Q. Classify the given living organisms according to their kingdom. The names of the kingdom are: Monera, Protista, Fungi, Plantae and Animalia.

Answer Key

Q4. Classify the given living organisms according to their kingdom. The names of the kingdom are: Monera, Protista, Fungi, Plantae and Animalia.

A: Animalia B: Plantae C: Fungi D: Monera E: Protista
